CROWN ZELLERBACH CORPORATION
CAMAS, WASHINGTON

Management REPORT

December 2, 1954 No. 98

JOHN H. DODSON retired yesterday from the Woodmill Maintenance crew. He had accumulated 11.6 years of service since coming to work in May 1943. He and Mrs. Dodson have four children, only one of whom, Mrs. Bill Sampson, lives in Camas. A granddaughter, Rita LaBarre, is employed at the Bag Factory. The Dodsons will continue to live in Camas.

HOMER CROSWELL, Bag Factory adjustor, was presented a $100 suggestion award check at the adjustors' meeting in the Bag Factory Friday morning. Bill Beaton, acting supervisor, made the presentation with the explanation that Croswell's suggestion concerned special spot pasting on the bottoms of carbon black bags.

CZ EMPLOYEES are being offered a group subscription rate for the Pulp and Paper Magazine. The special rate is a three years subscription for $5.00, a considerable saving over the usual yearly rate of $3.00. This magazine gives excellent coverage of Camas news and the continuous developments in the pulp and paper industry which has always been of interest to many CZ employees. Those who wish to renew their subscriptions at the new rate should see Bob Tueth, cashier, at this time for a prorating as all subscriptions in a group plan must begin at the same time. New subscribers may get blanks at the Clockroom.

FOURTH YEAR PAPER SCHOOL STUDENTS will hear Wm. Beaton, Bag Factory; E. D. Ochs, Converting Plant; S. Pauley, Printing Department; and C. E. Harris, Napkin Department and Wax Plant, speak on the operations of their respective departments tonight (Thurs.). On Monday, Dec. 7, J. V. Savage will describe the Sulfite mill to the First year class. W. C. Jacoby and H. C. Hall will introduce kraft pulp bleaching, pulp scheduling and stock distribution to the students of the Second year class on Wednesday, Dec. 8, followed by a visit to the Kraft Bleach Plant. The Fourth year class will not meet next week. Anyone interested in these lectures, whether or not he is enrolled in Paper School, is invited to attend.

THE GENERAL SAFETY COMMITTEE MEETING will be held this Thursday at 1:00. Last month's safety slogan: "Safety first is always best. Never settle for anything less."

The accident record now stands at 18 lost-time with 11 days since the last one occurred. Slight accidents number 322 compared to 359 on Nov. 30 last year.

HONOR ROLL

These departments have recently passed 100-day safety records:

Groundwood - 600 days
Printing - 1200 days
Mtce. Labor - 300 days
Painters - 1700 days

You Are invited to Obtain Extra Copies of this Report from Your Supervisor to Share with Your Family and Friends.

TWENTY-FIVE YEAR WATCHES have been presented recently to Ted Jurvakainen, Painters, George Devlin and Floyd Williams, Bag Factory. Bill Whetzel, inspector, Mill Fire department, has chosen a clock which will be presented to him tomorrow, Dec. 3. Each of these awards is in recognition of 25 years of service with the Corporation.

THE FIRST FIRE CALL since August was sounded Monday at 2 A.M. when No. 1 Paper Machine developed a hot bearing. Damage was slight.

NOTES FROM HEADQUARTERS

CROWN ZELLERBACH took an important step forward this month by going into commercial production of polyethylene coated paper. Successful operation of the new polyethylene extruder coater at Western Waxed-No. Portland made CZ the first western paper manufacturer to enter the rapidly developing plastics field.

"This step marks the opening of virtually unlimited new uses for CZ papers and offers new quality features of great importance to our customers," says Executive Vice President H. L. Zellerbach. The polyethylene extruder coater lays a film of tough, clear plastic on any type paper from tissue to heavy board. Current runs of polyethylene coated paper at Western Waxed-No. Portland are on LOCZIN, a high quality bleached or unbleached kraft. The North Portland plant is preparing a wide range of samples for the entire Crown Zellerbach, Western Waxed and Zellerbach Paper Company sales organizations.

Possible uses for polyethylene coated papers include multiwall bag liners, construction paper for use as a moisture barrier for inside walls, protective sheeting for hospital and dental use, for machinery parts packaging where flexibility and greaseproofness are important. Polyethylene coating is expected to play a major role in packaging such materials as chemicals, peat moss, sugar and dehydrated foods, where moisture absorption is a problem. One of the growing demands for polyethylene coated paper comes from nurserymen who are discovering that its use eliminates water evaporation in the shipment of plants, thereby enabling the shipper to economize on wrapping material, peat moss and water in packaging. In a trial run, one small nursery operator saved $7000 on postal and express charges alone because of greatly reduced weight.
